

Anne Catherine Sutherland

Australia's & other countries' militaries are bombing innocent migrating Whales, Tuna & other fish & in Queensland & in Oceans all around the World totally destroying our Planet with your childish war games. You are also trying to impose your bigotry on other countries by trying to bomb them into submission, spreading toxic vegetation killing chemicals so they cannot hide under trees to get away from your aggression & giving both their children & the your landforces there children with disabilities they do not deserve.

It is insane to continue in this way. Your kids do not deserve this.
