

Amador Navidi

*I believe charity starts at home, therefore, going to war - which is not for the defence of Australian land, is wrong, and the people responsible must answer for any losses!*

Dear Sir/Madam.

As a citizen, I would like the people responsible be questioned and pay the price of their decision for the death of our soldiers, the wounded ones, and the mental soldiers committing suicide, not to forget the cost that could be used for the wellbeing of Australians, which are the result of 20 years of intervention and participation in American's war.
