

David Stephens

*Have run the honesthistory.net.au website for 8 years; strong theme has been the need to emphasise other strands of our history than the military one.*

Australia needs to finally and strongly cut the defence and foreign policy ties with our great and powerful friends. This said on the very day that we see the announcement of AUKUS, which will lock us in more closely. We risk immolation and annihilation in wars which we have been duped into. As a grandfather, I fear for my grandchildren in 2021, in the same way that my parents feared for their children in 1962. It is shameful that we are still in this fearful state from generation to generation.
