

Cheryl Duffin

I wish my voice to be heard as an Australian citizen of voting age. I am totally against nuclear power and nuclear weapons. I am concerned about the obscene amount of money being spent. I am concerned about spent rods being dumped in our environment anywhere, be it above ground or below the sea. With the eminent warnings of climate change, I think it is totally irresponsible of our governments to be using uranium for anything other than medical. We should be using all our diplomatic resources before turning to this threat of aggression. No Nukes Ever.
Peace and justice prevail. Yours sincerely Cheryl Duffin
